Investment Strategy and Objectives

Midas hourly program seeks risk-adjusted absolute returns (pure Alpha) which are uncorrelated to other investment strategies, by trading in the spot gold market. It is a robust, high capacity investment vehicle, based entirely on systematic trading algorithms. The underlying strategy is momentum driven, based on a 'in house', mathematically built consolidation indicator which determines direction and market entry and exit levels. It is blended with a proprietary trend following system

Target returns are 30% to 40% after fees (negotiable) with a target annualized volatility of 20%.

Maximum leverage is 2 (= total net exposure can not be more than 2 times AuM)

JOIN THE PROGRAM

Minimum Initial investment \$ 1,000,000
 Increments \$ 250,000

historical Analysis	
12 Month Rolling Return :	40,03 %

Winning Months:	61
Losing Months:	24
Largest Monthly Gain:	25.49%
Largest Monthly Loss:	-9.41%
# round turns/month (average)	21

ABOUT TSA-EUROPE / FOUNDER

Founded in 2005 by Marc Verleysen.

Marc Verleysen (°1960) started his career in financial markets in 1986. He worked for a number of banks in Belgium as an interbank FX trader and as a proprietary trader. In 2003, he joined DRKW in Frankfurt am Main to set up systematic trading. After a reorganisation in 2005, he founded his own trading advisory company that targets institutional clients.

TSA-Europe is a fully automated, systematic trading advisor that uses the price of the underlying asset as the only input for the model.

TSA-Europe has been elected as trading advisor by a mid-size German bank in 2007, 2008, 2009, 2010 and 2011.

TSA-Europe was also in the final four of a prestigious competition in Germany where 130 new strategies competed for a mandate from a multi billion euro hedge fund.
